

Feedback

"It is an excellent essay. I believe that only through understandings like this will humankind be able to coexist in an increasingly "smaller" world. I also think that Christianity owes much of the "Gospels" to eastern philosophies that Jesus may have learned in Egypt. That is my opinion only, I have no proof of this. When I was a child, my grandmother told me that Jesus lives in my heart, and she taught us all by example. It took me nearly 40 years to understand what she meant. I am fortunate to have known a person like her. May we all come to understand one another with our love for each of us." - Robby Garner (www.robtron.com) (Year 2004)

Winner of Loebner Competition (Formalized Turing Test) two years running (1998-99). Garner's 'Conversational Creations' include FRED, Albert and Albert 2. Robby has also been called a freak by some of the best people he knows.*

"Nitin, I enjoyed your essay. I think that the next step IS for Religion and Science to come together - to 'synthesize'. They are like two arms of God. They seem to be in opposition, but they are not. A lot of Science is starting to validate themes that relate to Religion and God - for example, the origin of the Universe. This IS a theme that needs thought and discussion. I wish you success in your considerations of these ideas and themes." - Jim Pinto, www.JimPinto.com (Year 2004)
