# TECH ANANDA

- Welcome! The name Techananda is inspired from the Yoga system of Bharata (India), which has been cherished and enjoyed by millions of people all cross the globe. Great Yoga system of Bharata (India) has produced many saints – Vivekananda, Dayananda etc., who realized their real nature and God by selecting particular value; '*vivek*' means intellect, '*daya*' means Compassion. We believe science particularly information technology could be a great vehicle in our mission, thus comes the name 'Tech + Ananda'
- Ananda is a Sanskrit word which means joy, bliss and supreme happiness. The state of Ananda was also called as Nirvana by Buddha, which is exactly what we are after in our search. We seek joy, the Ananda in re-union with God and our real nature.
- Techananda is a world wide group of people who share the search of higher truth or God, through science and technology. We all share with each other a quest for our own higher self and God and We seek this through technology
- We extend a warm hearty welcome to everyone -- Saints, students, religious scholars, teachers, programmers, scientists and everybody who loves science and wants to make it a vehicle in connecting with their real self and God. This website is a living laboratory for all such people. This group was founded in 2004. It is not a country, religion or specific group
- We encourage discussions of the great teachings of Religions, Science and Yoga; we learn and study together, share ideals, support and friendship. We are really a spiritual family to dedicated to helping each other, build new technology products, do research and find real truth through science and to share this light with others.
- You can contribute in this mission with your thoughts, ideas, discussions, forwarded messages, postings, book review and by participating in chat sessions, forming research groups, making resources for education and participating in our experiments.
- Dear visitor: if you would like to join our group, please membership form and we will contact you as soon as we can.

Thank you and May God bless.

---

In the new millennium that is already upon us, Computers and Information Technology is likely to become a basic skill like driving. While a chosen few will continue to serve as vanguards of the I.T. revolution - developing systems software, components and application frameworks - virtually everyone else will use I.T. tools at some "expert" level to process, analyze and disseminate information in the course of their normal work and life.

East India Technologies recognizes the challenges of the new millennium and makes a firm commitment to career development. I.T. professionals today are not just elite amongst professionals but also deeply involved in what is perhaps the grandest experiment of all: the Future. East India Technologies takes pride in being a part of this grand experiment.

**What kind of people do we need?** Models, Artists, Writers, Programmers and Designers. We need people from different backgrounds, education and professional experiences. People with deep passion and desire to accomplish dreams. We look for intellectual horse power, creativity, and good humored personality.

Can you listen as well as articulate your own point of view? There are some times in project, when we all feel bogged down but hey, we never give up! Can you seize opportunity and take action? Build a team and encourage and facilitate a shared vision? Do you exhibit signs of Positivism, and willingness to take personal risk?

Anyone can invest their future and also do well in short term association with us. We give creative autonomy within consistency and control. We work on low cost AND highest quality, to create wealth for all share holders and employees. We live, breath and express our mission and goal in everything we do. We do not sleep if have not performed well in day. Conservative yet bold - This is the way we live!

## Welcome to Tech Ananda!

A global virtual community which seeks bliss in synthesis of science and religion

**Who are we?** Tech Ananda is a world wide group of people who share the search of higher truth or God, through science and technology. We all share with each other a quest for our own higher self and God and we seek this through technology. Ananda is a Sanskrit word which means joy, bliss, supreme happiness, also called as Nirvana by Buddha. This is exactly what we are after in our search, we want to find that joy, that Ananda in re-union with your real nature and in union with God.

**What does techannda means?** The name Techananda is inspired from Yoga system of India, which has been cherished and enjoyed by millions of people all cross the globe. Great Yoga system of India has produced many saints - Vivekananda, Dayananda etc., who realized their real nature and God by selecting particular value; 'vivek' means intellect, 'daya' means compassion. We believe science particularly information technology could be a great vehicle in our mission, thus comes the name 'tech-ananda'.

**Who can join this group?** This group was founded in 2004. This is not a country, religion or specific group. We invite and warm heartedly welcome all -- Saints, students, religious scholars, teachers, programmers, scientists everyone who love science and wants to make it a vehicle in connecting with their real self and God. - You can contribute in this mission with your thoughts, ideas, discussions, forwarded messages, postings, book review and by participating in chat sessions, forming research groups, making resources for education and participating in our experiments.

## **BACKGROUND:**

Evolution is a constituent of each one of us, a gift of life. Evolution is growth and progress. Humans colonized, created sects, societies and countries. Individuals in these societies study surroundings, observe and learn and try to contribute in the betterment of their society.

Observation and experience, and our relationships with other human beings are the source of all knowledge. Humans implemented the collected knowledge on logical assumptions and

developed theories and devices from them. This is called Science. Societies realized evolution and progressed towards betterment on the vehicle of technology, which drove them forward and upwards towards growth.

Fast-forward to the current era, booming with technology and competition among societies. Technology stands at its pinnacle with the ideas of biological cloning, the electronic mind, weapons, space shuttles and even efforts to decipher highly abstract human attributes like emotions, spiritualism and creativity. But modern technology has also contributed to the moral degradation of our society.

Science deals with the truths of the physical world while religion deals with the truths of the metaphysical world. The success of science is so enchanting, so alluring, that, in its material success, we forget its true purpose. Science is blind. It is becoming the vehicle of evil. It does not know the difference between good and bad. Science makes a nuclear bomb, but it can also create the ability to generate electricity.

The contribution of science and technology to the decline in morality cannot be denied. Adult Videos, sold in even the smallest corner store are a part of one of the largest industries and an even bigger business on the Internet. When the Internet was born, it was with the vision of spreading education among universities but today it has become a slave of pornography. This is not the first time but is a repeat of how television evolved, for television was also seen as a means to education. The Internet, which grew into e-learning and distance education, has been smothered by pornography and other evils and is rapidly becoming the moral sewer of society.

Military expenditures all over the globe have increased each and every year. Million of scientists and engineers around the world are engaged in weapons research. It is doubtful if the vast majority of them have any desire for war. But even a child knows that weapons are made to kill, to destroy people, cities and countries. Today, countries are manufacturing and selling far more dangerous instruments of war and death than ever before. Weapons have become a big business, a kind of industry in the world.

The contribution of science and technology to the decline in morality cannot be denied. Adult Videos, sold in even the smallest corner store are a part of one of the largest industries and an even bigger business on the Internet. When the Internet was born, it was with the vision of spreading education among universities but today it has become a slave of pornography. This is not the first time but is a repeat of how television evolved, for television was also seen as a means to education. The Internet, which grew into e-learning and distance education, has been smothered by pornography and other evils and is rapidly becoming the moral sewer of society.

Religion is like eyes to the society. Religion provides humanity with a vision of righteousness and the ability to distinguish between good and evil. Religion suggests how individuals can

grow and progress in life and help us decide what is in the best interest of each and every person and society in general. Values taught by Religion free our mind from all errors and drive us on a path of growth and success towards a meaningful life. To understanding the difference between good and evil, permit me to borrow from an email I received the other day.

The Ocean is our Universe. Religion is the map. Saints and ethics are our guides. Principles are the lighthouses, the truths, which we more than often ignore due to pride. They are the natural Laws, the godly manifestations that cannot be changed or broken It has been wisely said, that it is impossible for us the break the law. We can only break ourselves against the law. The saints, ethics and religions help us, like guides, Maps are there for us to check and confirm that we are on the right track in finding God.

#### TEACHANANDA IS ABOUT:

- Religion and Science
- Truth and Technology
- Technology and Eternal Bliss
- Science of Inner Peace
- Joy of Technology
- East and West Perspectives
- Peace and Perfection
